Maverick Blogger Template Installation Documentation, a step to step guide to help you out to set up your blog easy way.

First of all, Thank you for Downloading our template if you haven't done yet you can get it from here: [Maverick Blogger Template](#). You check the live demo through the button below and also Please Read this documentation carefully in order to set up your blog and please note that there's no support for free users.

1. Installation

Open your purchase folder, you will see a file with name **Maverick-(Free or Premium)-Version.xml**

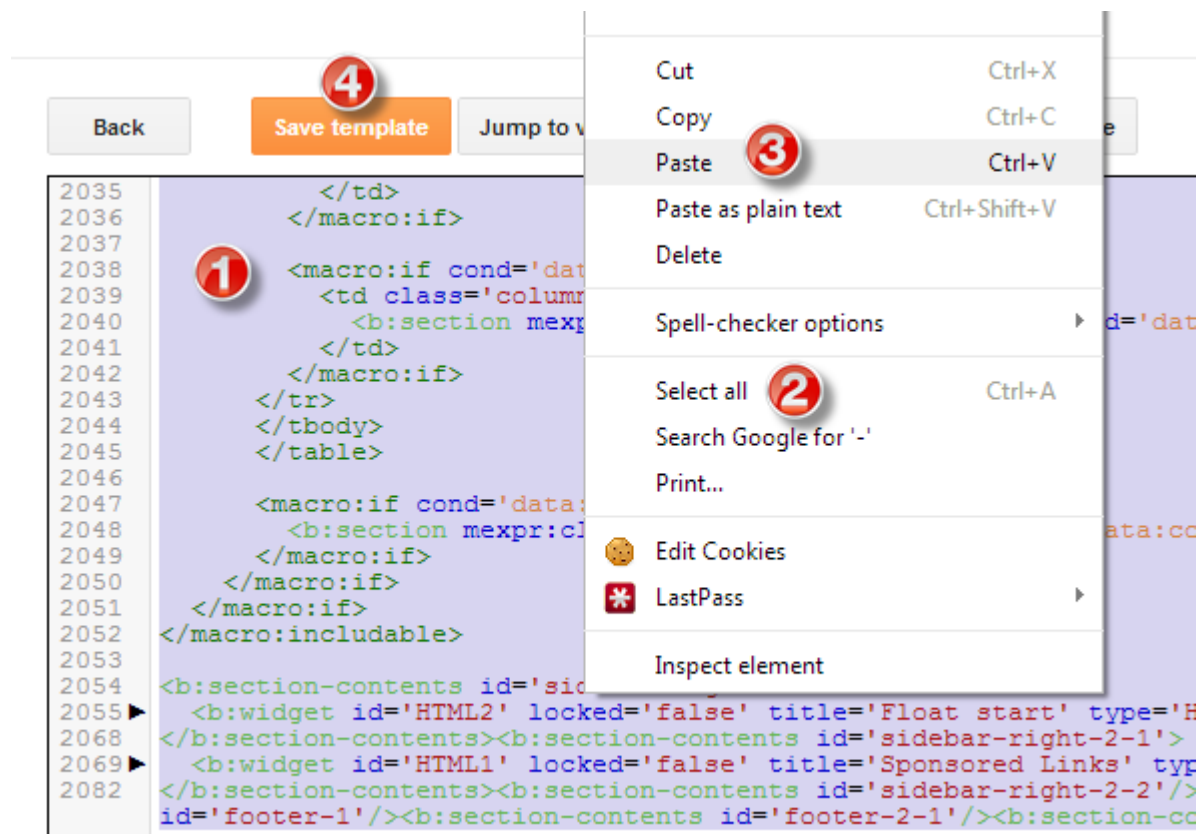

Open this XML file with a text editor (Notepad or something like that). Then select all text and copy (Ctrl+A, Ctrl+C in Window).

Return to your blog dashboard, access your **Template** menu, click **Edit HTML**

The screenshot shows the Blogger dashboard interface. At the top, there's a header with the Blogger logo, a pencil icon, a document icon, and a 'View blog' button. Below this is a section titled 'My blogs' with a blacked-out blog name followed by a 'Template' link. On the left sidebar, there's a 'New post' button and a list of menu items: Overview, Posts, Pages, Comments, Google+, Stats, Earnings, Layout, Template (highlighted with a red circle and the number 1), and Settings. The main content area has a heading 'Start with a base template and customize your background, layout, colors' followed by 'Live on Blog' and 'Mobile' sections. The 'Live on Blog' section shows a preview of a blog and two buttons: 'Customize' and 'Edit HTML' (highlighted with a red circle and the number 2). The 'Mobile' section shows a preview of a mobile blog view and a settings gear icon. Below these is a 'Simple' section.

In **Editor HTML** window, select all old code and paste the new code that you copied from the release file into code field. Then, click **Save template**.
